

Appendix A. List of priority streams in the Tucannon River Core Area. Includes streams with current or recent (last 12 years) bull trout observations (juvenile, subadult, adult, or redds) and potential local populations where bull trout have not been observed but that are identified for their habitat potential and possibility to contribute production toward recovery goals.	
Stream	Recent Observations
Upper Tucannon River	Yes , redds, adults, juveniles (USFS, <i>in litt.</i> , 2002)
Panjab Creek	Yes , redds, adults (USFS, <i>in litt.</i> , 2002)
Turkey Creek	Yes , redds in 1999 (USFS, <i>in litt.</i> , 2002)
Meadow Creek	Yes , redds in 1999 (USFS, <i>in litt.</i> , 2002)
Little Turkey Creek	Yes , redds in 1999 (USFS, <i>in litt.</i> , 2002)
Bear Creek	Yes , redds, adults, juveniles (USFS, <i>in litt.</i> , 2002; USFS 1992d)
Sheep Creek	Yes , redds, adults, (USFS, <i>in litt.</i> , 2002)
Cold Creek	Yes , redds in 1999 (USFS, <i>in litt.</i> , 2002), juveniles (USFS 1992f)
Hixon Creek	Yes , subadults, no spawning (Mendel, pers. comm. 2002b)
Cummings Creek	Yes , juveniles only (USFS 1992b)
Little Tucannon River	No , but has potential to produce fish
Pataha Creek	No , historical presence only, lower 72 km (45 miles) of watershed extremely degraded (Groat, pers. comm. 2002a)
